

# Oluwatobi Abayomi

FRONTEND WEB DEVELOPER

## SUMMARY

A dedicated and results oriented individual with a passion for fullstack development with a strong background in front end web development. Can transform designs into nearly pixel perfect UIs and can work even when design systems are limited. Possesses excellent problem solving skills, adaptability to new systems and a desire to stay current with industry trends and advancements. Seeking a position where I can gain hands on experience and contribute to the success of a team. I may not be the most experienced but I am willing to work twice as hard as everyone else.

## WORK EXPERIENCE

### ● Intern Frontend Developer

TEKSPHERE GLOBAL SERVICES

JULY 2023-DECEMBER 2023

Learnt the process and the different stages of the development of application products. Contributed to development of the frontend of a Logistics app by writing code for user interfaces and components using HTML, CSS and Javascript. Provided input and suggestions at the decision making stages and testing of the development of the Logistics application. Created a Wordpress application for a training institute.

### ● Frontend Developer

RENT4U

OCTOBER 2023 - CURRENT

- Leading the frontend development efforts, playing a critical role in shaping the technical direction and strategy of the startup's web application.
- Have made and still making key decisions regarding the selection of frontend technologies and frameworks, for in a streamlined and efficient development process.
- Collaborating closely with the designer to translate the prototype into a responsive and user-friendly web interface.
- Developing a scalable and robust frontend architecture, ensuring the application's high performance and reliability.
- Have given suggestions about the structure of the backend of the web application and will be looking to contribute to building it.

### ● Fullstack Developer

PERSONAL PROJECT - FACE RECOGNITION APP

August 2023-September 2023

Using Clarifai's face detection API, I created a web app using best practices that takes image input from users and detects faces in them. I also built a backend that can sign in and register users and track their entry count. This project was built using ReactJs, TailwindCSS, NodeJs, ExpressJs, Postgresql, Clarifai and some other packages. It was also deployed on render.

## EDUCATION

### ● B.Sc Computer Science

UNIVERSITY OF ILORIN

OCTOBER 2019 - OCTOBER 2024(ONGOING)

## SKILLS

HTML CSS JavaScript MVC React Security API Design Git

User Experience Design Webpack Database Design Bootstrap Sass Node.js
